Browsing the sample catalogue

TNGB sample catalogue is publicly accessible at <http://biobanknetwork.telethon.it/Pages/View/Catalogue>

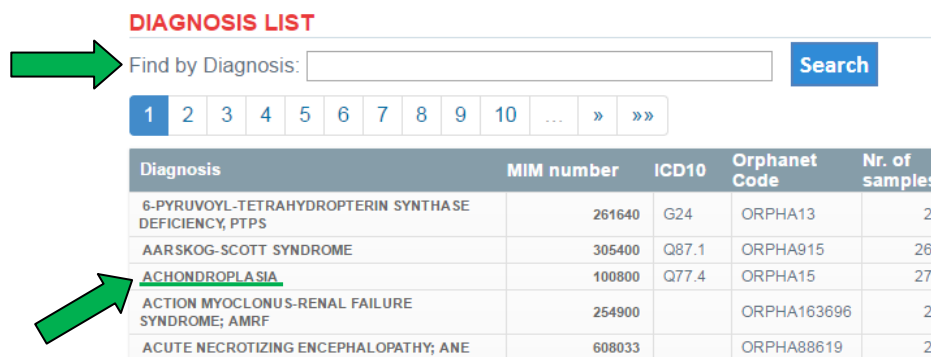

ONLINE CATALOGUE

Samples can be searched:

- (a1) by “Diagnosis”, the disease name can be typed in the free text field or directly selected from the list. The related OMIM webpage will open by clicking on the MIM number.

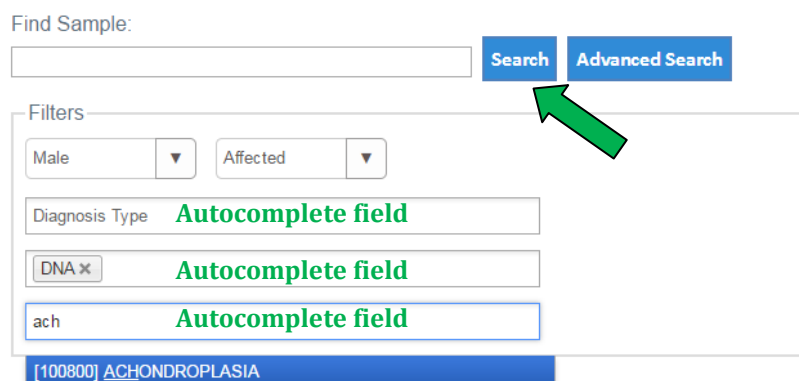

- (a2) through the advanced search tool, click on “Advanced search” to open the filter search box. Then, after having selected the filters, click on “Search” to obtain your search results

FREE SEARCH SAMPLES

FREE SEARCH SAMPLES

(b) regardless the tool used to perform the search (a1) or (a2), the system will display the list of the search results

Country * ▼

I agree to the [Terms of Service and Privacy Policy](#)

Please select one among:

- **Academic:** users working for academic/public institution or no-profit organisations
- **Corporate:** users working for for-profit organisations
- **Private:** patient family members
- **Association:** users belonging to a patient organisation

- (c) a pop-up window will notify that the registration has been successfully sent to the system and the new account needs to be activated by clicking on the link sent to the e-mail address given in the registration form

TELETHON NETWORK OF GENETIC BIOBANKS

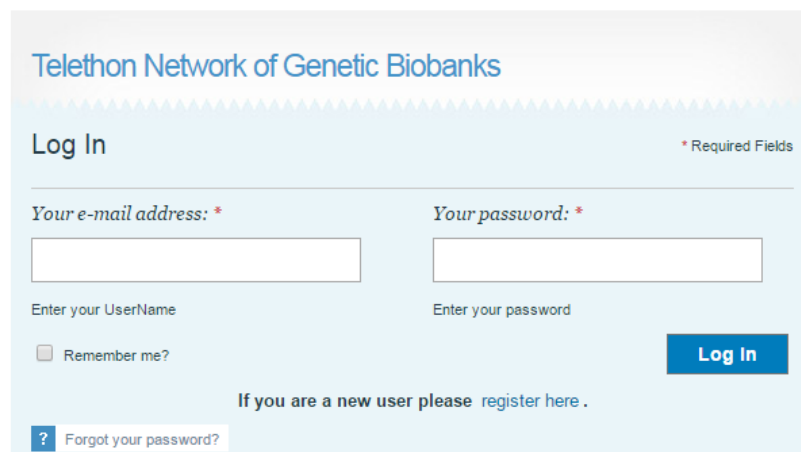

To activate your account, please click the link in the activation email which has been sent to you

- (d) click on the link received by email to activate your account

Registration Confirmation

Dear Ms , new account created successfully. To activate your account please click on the link below: <http://biobanknetwork.telethon.it/Account/ActiveAccount/CUgxSHKcyaDjinX-R1ladA2?>

(e) your account is now activated and you can log in

User management menu

By logging in you will have access to the user management menu (right side of the screen) which enables to manage your profile, check the status of already submitted requests and submit new ones.

Click on your email address to access the user management area and edit your profile

New request submission form (without samples selection)

New request submission

- (a) log in at <http://biobanknetwork.telethon.it/Account/Login> using your credentials. If you are a new user, please click on “register here” and follow the procedure for User registration.

- (b) if you do not need to select specific samples (“open request”), please go to (c); otherwise, if you want to select the samples, start by Browsing the sample catalogue. After having accessed the sample details, click on “Add to request” button to add the sample(s) to your request. Repeat for all samples you would like to add to your request. Note that samples will remain selected in your request until the submission, even when you log out.

- (c) In the User management menu click on “New sample request”. A webpage will open displaying the sample request submission form to be filled in as follow.

SUBMIT REQUEST

MANDATORY FIELD
Complete with the title of your project or the reason why your are requesting the sample(s)

Specify the research grant under which the project is conducted

MANDATORY FIELD
Specify the research sponsor financially supporting the project

MANDATORY FIELD
Select the most appropriate

Add any note and specify here if you had prior contacts with a specific Biobank

* Required Fields

Project Title *

Research Grant
e.g., EU Research Framework Programme

Research Sponsor *
e.g., European Commission

Project Number (if available)

Period of Funding

Brief project description (max 1000 char) *

Ethics Committee Approval *
[select Ethics Committee approval] ▼

Request reason
 Research Diagnostic

Note or Previous Agreements

SAMPLES SELECTED

ID	Description	
20403	Fibroblast cell line	Remove
67773	DNA	Remove
67776	DNA	Remove

Submit Request

Specify the number of the project and the period of funding (free text fields)

MANDATORY FIELD
Briefly describe your project, including aims, planned experiments and expected results

MANDATORY FIELD
Select the most appropriate from the dropdown list

If you have submitted an open request, this field will be empty

- (d) After submitting your request, the system will notify through a pop-up and an e-mail message that it has been successfully sent.

Request sent successfully
biobanknetwork

Dear Ms , request sent successfully. You can track the progress by clicking on the following link:
<http://biobanknetwork.telethon.it/CP/ManageRequest?requestId=432>

- (e) The request is centrally received and evaluated by the Network Board, after its approval the assigned biobank will directly contact you and send the appropriate MTA form which has to be filled in and signed by your Organisation.

From now on, contacts between the researcher and the biobank will be direct and occur through their own e-mail addresses. Researchers can check anytime the status of their request through the User management menu.

General info

- General questions can be addressed to the Network coordination Office at biobanknetwork@telethon.it
- Questions about the request status, the samples characteristics or the data associated to the samples should be addressed directly to the assigned biobank. Network contacts are managed by the Coordination office who does not have this type of information
- If any problem is met during any of the above described procedures, user can contact the Support Office at support@biobanknetwork.org
- Descriptions of the services provided by the Network, access rules and request approval procedure are available at <http://biobanknetwork.telethon.it/Pages/View/Services>
- A template of the Network documents (e.g., MTA and Informed consent) can be downloaded at <http://biobanknetwork.telethon.it/Pages/View/Documents>
